

Information Resources

By David R. Larsen

When working on a report you have several information resources available to you. They include:

- Text books for the course. (Zar, 1996; Husch, Miller and Beers, 1993; Krebs, 1989)
- Web pages for the course. (Larsen, 1998), (<http://www.snr.missouri.edu/nr3110>)
- Books on the subject you are investigating in the Library. The index is called Merlin (laurel.iso.missouri.edu)
- Journal articles on the subject you are investigating. Several good indices can be found at Ellis Library (www.missouri.edu/~elliswww/)
- Web resources in your field. Many Natural Resource Electronic Journals are listed the Professional Societies and organizations pages on the side bar for your department.
- Discussions with professionals in your field.
